Temperature-Controlled Reefer Services

We'll keep your items damage-free with our reliable, climate-precise transport solutions. Route King's advanced refrigeration network ensures your sensitive cargo—from fresh produce and pharmaceuticals to frozen goods—arrives in perfect condition across Canada's most demanding routes and climate extremes.

With real-time temperature monitoring and dedicated cross-country routing, we deliver cold-chain excellence that protects your inventory and your reputation every mile.

Why Choose Our Reefer Services?

- ✦

Flexibility & Versatility

From fresh produce and pharmaceuticals to frozen goods, our fleet adapts seamlessly to diverse cargo volumes and tight scheduling needs across every Canadian province.
- ✦

Controlled Environment

Advanced, state-of-the-art refrigeration units maintain strict, micro-precise climate conditions, completely shielding your sensitive goods from severe Canadian weather extremes.
- ✦

Speed and Efficiency

Optimize your cold-chain logistics with dedicated cross-country routing and real-time temperature tracking to ensure your shipments arrive fresh, safe, and right on time.
- ✦

Safety & Compliance

Full TDG compliance, certified equipment maintenance, and continuous temperature logging meet all regulatory requirements for food safety and pharmaceutical transport standards.

Temperature Specifications

-20°C to +15°C

Temperature Range

±2°C

Precision Variance

Every 15 Min

Monitoring Interval

- ### Key Service Benefits
- ✔ **Real-Time Tracking:** GPS and temperature monitoring with instant alerts for any deviation
 - ✔ **Medical-Grade Sanitization:** Full sanitization between loads to prevent cross-contamination
 - ✔ **Pan-Canadian Coverage:** Established routes covering all provinces with minimal temperature fluctuation
 - ✔ **Full Compliance Documentation:** Complete records for food safety and pharmaceutical integrity verification
